WEBSITE SUMMARY

Website Score for sofwave.com

Based on a total score of 100 points, sofwave.com received a score of 73. The Website Score is a collection of scores from 4 key sections of this report.

Section 1 is the Link Status Section; it tests every hyperlink of the website and records the 'status response'. A response of '404' indicates a broken link, which may lead to decreased SEO performance along with a bad user experience.

Section 2 is the Cookie Status Section; it tests every dynamic and static cookie of the website and records all data being transferred between the client and the server. The goal is to help site-owners understand the types of cookies present and the types of data being gathered. Cookies, when combined with website policy information, may provide a deeper understanding of compliance.

Section 3 is the Policy Status Section; it seeks out, records, and assesses which policies are present on a website. Once the policies are identified an assessment of the policy's 'Last Revised Date' is made. If you see degraded scores in this area it may mean that there are no obvious 'Last Revised' dates associated with each policy.

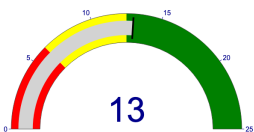

Section 4 is the Beacon Status Section; while beacons are often referred to as 'Pixels', by any name these invisible engines are hard at work gathering the activity of the user across this site and, possibly, across other sites. Through access to the Report Appendices, all beacon information may be searched to stay fully informed on what information is being gathered and where that information is going. Information such as a cookies IP Addresses of origination is included.

Website Policy Status Summary

As data privacy continues to be a critical concern in the digital age, it's imperative for IT department heads to prioritize the implementation and adherence to robust privacy policies on their websites. Privacy policies serve as the cornerstone of transparency and trust between businesses and users, outlining how personal data is collected, used, stored, and protected. These policies should be comprehensive, easily accessible, and written in clear, understandable language to ensure users can make informed decisions about sharing their information.

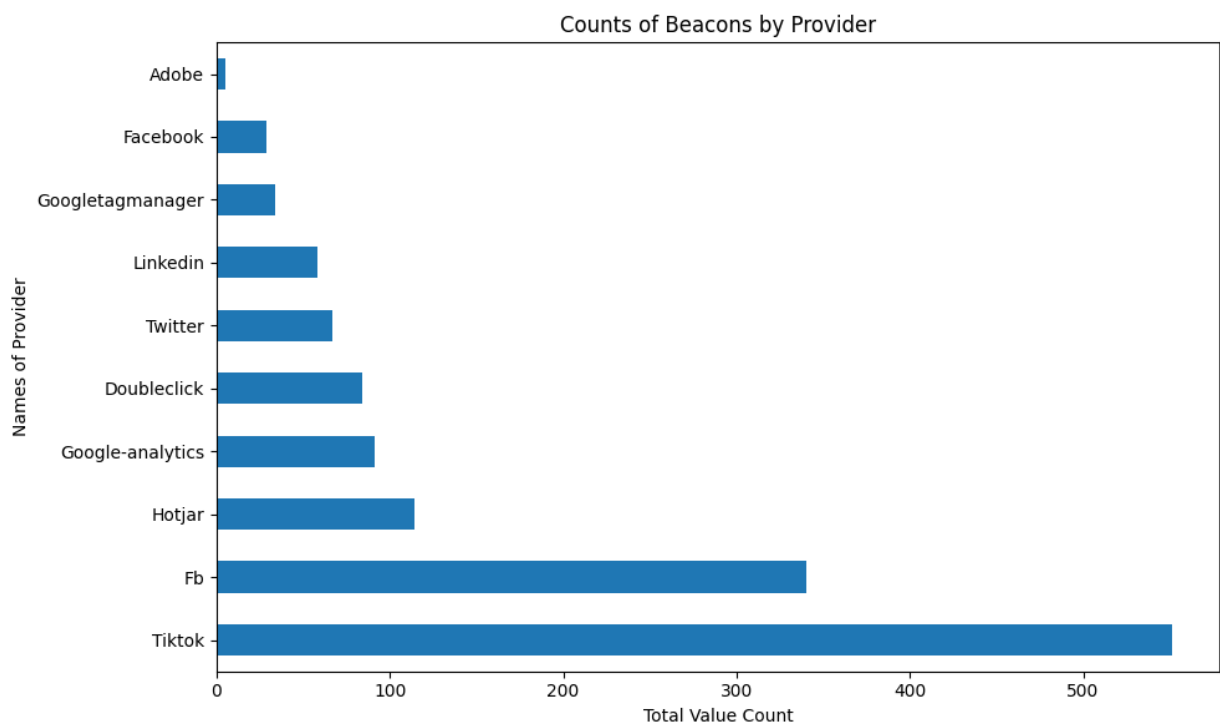

In addition to privacy policies, organizations must also prioritize cookie policies that provide clear information about the types of cookies used, their purposes, and users' consent mechanisms. With regulations like CCPA and GDPR shaping the global data protection landscape, IT leaders must ensure their policies align with these frameworks, offering users greater control over their data and implementing robust data protection measures. Moreover, accessibility policies play a crucial role in ensuring inclusivity, making digital services accessible to all individuals, including those with disabilities, and fostering a more inclusive online environment. By proactively addressing these aspects and staying abreast of evolving privacy regulations, IT departments can build trust, enhance user experiences, and mitigate risks associated with data privacy and security breaches.

WEBSITE BEACON STATUS

What does this section test?

- Provides insight into website Beacons (aka Pixels).
- Beacons are typically embedded and invisible to end users.
- Beacons are used to gather data on user behavior.
- Beacons are capable of accessing website & email data.

Website Beacons

Websites often use beacons to track user behavior for Marketing, Advertising, and Analytics.

Website Beacon Status Summary

Website beacons, or pixels as they're often referred to, may be capable of gathering user data and used for Analytics, Marketing, and/or Advertising. This website uses a total of 1373 beacons. Of those 1373, 10 companies or services are gathering data.

The largest beacon providers are Tiktok with 551 services, Fb with 340 services, and Hotjar with 114 services. Of note, TikTok is listed as a website beacon provider with 551 services across the website.
